Jonathan Alexander Carrillo Cortés

joacarrilloco@unal.edu.co   github.com/joacarrilloco   linkedin.com/in/joacarrilloco   +57 318 238 89 68

Education

Universidad Nacional de Colombia – Bogotá D.C   Expected graduation date: February 2023
Bsc. Systems and Computing Engineering   *GPA 4.5/5.0*

Work Experience

Valiu S.A.S - *Junior Back-end Developer*   July 2020 – April 2021

Worked on a 20 microservices back-end using **NodeJs**, **TypeScript**, **PostgreSQL**, **MongoDB** and **GraphQL**. Designed and developed a **NodeJs** microservice, capable of executing low latency remittances from Colombia to Venezuela, which took at most 10 secs. This microservice executed more than 28k transactions for a total amount of 300k USD.

Course Projects

Bash 2 Bash - *Programming Languages*   January – July 2021

Created API tool that executes translations of the most common Unix commands to the most common Windows-DOS commands, used **Java** and **ANTLR** for the language processing.

Blur Filter - *Parallel and Distributed Computing*   January – July 2020

Developed a Gaussian Blur image filtering program in **C**. The program has multiple versions that where programmed using different parallel computing tools: **POSIX Threads**, **OpenMP**, **CUDA** and **OpenMPI**.

Taurus - *Software Architecture*   July – December 2019

Worked in a team of 5 developers designing and developing a mobile and web multiplayer maze game, utilized **Docker**, **Kotlin**, **Spring-Boot**, **GraphQL**, **JavaScript** and **React-Redux**. My main accomplishment in the project was the Implementation of a procedural maze generator based on Kruskal's algorithm.

Skills

Programming Languages

>1 year: C++, C, Java
<1 year: Python, Kotlin, TypeScript, JavaScript, Ruby, VHDL

Awards

- Contestant at the 2020 ICPC World Finals, Moscow, Russia
- 1st place out of 49 at the 2019 ICPC South America / North Regional Contest and 2nd place in the whole Latin American region
- 1st place out of 119 at the 2019 ICPC Colombian National Contest
- 1st place out of 116 at the 2018 ICPC Colombian National Contest

Leadership

- Coach teams at the Competitive Programming group of my University, organize lectures on algorithms and guide new members
- Give lectures and mentor high-school students at the Colombian Computing Olympiad program

Technologies

Vim, Git, PostgreSQL, MongoDB, Spring Boot, POSIX, OpenMP, CUDA, Ruby on Rails

Relevant Courses

- Algorithms & Data Structures
- Software Architecture
- Software Engineering 1 & 2
- Operative Systems
- Parallel and Distributed Computing
- Introduction to Intelligent Systems
- Introduction to Quantum Computing

Languages

- Native Spanish, Proficient English, Conversational German and French

More About Me

- Interests: Software Engineering, SRE, Back-end, C++, Computational Geometry, Quantum Computing, AI
- Love listening music and playing guitar
